Education

Sahyadri College of Engineering and Management

B.E. in Computer Science (Artificial Intelligence & Machine Learning) - CGPA: 8.87

Sept 2023 – Aug 2027

Mangalore, Karnataka

Experience

MyClickBook

Full Stack Developer Intern

May 2026 – Jul 2026

- Developed and enhanced **React Native** features for a **SaaS appointment booking platform**, implementing authentication, onboarding, vendor workflows, Google Sign-In, localization, and responsive UI from Figma designs.
- Integrated and tested **REST APIs**, performed end-to-end debugging, resolved frontend and backend issues, and collaborated using **GitLab** in an Agile development environment.

Projects

RetailMind | React 19, TypeScript, .NET 8, FastAPI, PostgreSQL, Redis, Docker, AWS EC2

Jul 2026

- Built an **enterprise-grade AI-powered retail and supply chain platform** using **React 19**, **.NET 8 Clean Architecture**, **FastAPI**, and **PostgreSQL** with secure JWT-based authentication.
- Developed ML-powered **demand forecasting** and **delivery time prediction** services, integrated through a Python FastAPI microservice with Redis caching for high-performance predictions.
- Designed and deployed a complete **Dockerized microservices architecture** on **AWS EC2** using Docker Compose, Nginx Reverse Proxy, and PostgreSQL, delivering a production-ready cloud application.

DevPilot | Python, FastAPI, Next.js, TypeScript, PostgreSQL, Redis, LangGraph, Docker

Jun 2026

- Built an AI-powered software engineering platform that automates GitHub pull request reviews using a **5-agent LangGraph** workflow, inline AI reviews, and automated fix suggestions, reducing manual review effort by **70-80%**.
- Developed a scalable backend with **FastAPI**, **Redis**, **Celery**, **PostgreSQL**, **GitHub OAuth**, and Webhooks.
- Developed AI review dashboards, repository analytics, and secure **JWT**-based authentication and authorization.

FedCare AI | React, Vite, FastAPI, PyTorch, XGBoost, Scikit-learn, SQLite, Federated Learning

Aug 2026

- Built a **privacy-preserving federated learning platform** enabling multiple hospitals to collaboratively train disease prediction models while keeping sensitive patient data securely on local systems and sharing only updates.
- Implemented **FedAvg** for distributed local training and secure global model aggregation across hospital nodes.
- Integrated **PyTorch CNNs**, **XGBoost**, and **Logistic Regression** to build multi-modal disease prediction pipelines with model training and evaluation.

Technical Skills

Languages: C, C++, C#, Python, JavaScript, TypeScript, SQL, HTML, CSS

Frameworks & Libraries: React.js, Next.js, .NET, React Native, Express.js, FastAPI, Tailwind CSS, Bootstrap

Databases & Cloud: MongoDB, PostgreSQL, AWS, Redis, Firebase, Supabase, Google Cloud

Tools & Technologies: Git, GitHub, GitLab, Docker, Postman, REST APIs, Google OAuth, Linux, Vercel, Jupyter, VS Code, OpenCV, n8n

Research

Multimodal Deep Learning for Automated Arecanut Quality Classification (SSRN Preprint)

- Published an SSRN preprint proposing a multimodal deep learning framework integrating RGB and X-ray imaging, achieving up to **99.80%** accuracy for automated arecanut quality classification.

Certifications

Oracle: OCI 2025 Certified Generative AI Professional

Google Cloud: Introduction to Generative AI Studio

TATA: GenAI Powered Data Analytics Job Simulation

Deloitte: Data Analytics Job Simulation

NPTEL: Python for Data Science

Infosys SpringBoard: Deep Learning for Developers

Achievements

- Finalist, Inferentia 2.0 State-Level AI Hackathon, PES University
- Finalist, Hack-A-Thon: AI for Education, ThinkPlus & SkillUp

Sept 2025

Dec 2025
